

Massachusetts ME/CFS & FM Association Annual Meeting

Saturday, October 26th, 2019

1 - 4 pm

Newton-Wellesley Hospital

Shipley Auditorium/Bowles Conference Center

2014 Washington Street

Newton, MA 02462

Keynote Speaker:

Michael VanElzakker, PhD

Investigating ME/CFS at the intersection of the nervous and immune systems

Dr. VanElzakker will discuss some challenges and opportunities in using brain scans to study communication between the immune and nervous systems. He will describe two ongoing studies that seek to elucidate autonomic dysfunction and possible neuroinflammation in ME/CFS. He will also give an update on the OMF-funded Harvard ME/CFS Collaboration.

Michael VanElzakker, PhD is a research fellow in the neurotherapeutics division of Massachusetts General Hospital/ Harvard Medical School.
